ADL (Acquisition Distribution Layers)

Acquisition Distribution Layers, or Transfer Layers are sub-layers designed to improve fluid-management in hygienic products. Can accelerate the absorption and distribution of fluid on Baby and Adult Diapers, Underpads, Feminine daily pads and others.

Product Details:

PRODUCT			FIBERS	WEIGHT RANGE	EMBOSSING
ADL	THERMOBONDED	MULTI HYDROPHILIC MULTI DENIER	PP, PET BLENDS	18-70 GMS	D,M
	THROUGH-AIR HI LOFT		BICO, PET, PP OTHERS BLENDS COLORS	18-80 GSM	

Thermobond
Excellent hydrophilic properties. Our carded thermobond material is softer and more pleasant to touch, offering improved web uniformity and appearance.

THROUGH-AIR HI-LOFT
Premium 30 to 70 GSM high bulk, low density through air bonded, acquisition distribution layer fabrics. Exceptionally efficient in attaining improved penetration and in preventing rewetting.

Technics	Nonwoven
Supply Type	In-Stock Items
Material	100% Polypropylene
Nonwoven Technics	Hot Air Through
Pattern	Flocked
Style	Plain
Width	3-10cm
Feature	Water-Soluble
Use	Hospital, Hygiene, Industry
